Constam, D.B. and Robertson, E.J. (2000) SPC4/PACE4 regulates a TGFbeta signaling network during axis formation. *Genes & Development*, 14, 1146–1155. [This is the first evidence that PACE4 is critical for body axis formation.]

Essalmani, R., Zaid, A., Marcinkiewicz, J., et al. (2008) In vivo functions of the proprotein convertase PC5/6 during mouse development: Gd11 is a likely substrate. Proceedings of the National Academy of Sciences of the United States of America, 105, 5750–5755. [This is the first evidence that lack of PC5/6 results in lack of homeotic transformations.]

This is the first evidence that in mice PC7 regulates behavior in hippocampus and amygdala.
