Chapter 10

Masu, Y., Nakayama, K., Tamaki, H., Harada, Y., Kuno, M. and Nakanishi, S. (1987) cDNA cloning of bovine substance-K receptor through oocyte expression system. Nature, 329, 836–838. [Describes the cloning of the substance K GPCR by functional expression, the first neuropeptide GPCR cloned, and one of only a handful of GPCRs that were cloned by this method which does not rely on previous structural information about the receptor.]

Milligan, G. (2013) The prevalence, maintenance, and relevance of G protein-coupled receptor oligomerization. Molecular Pharmacology, 84, 158–169. [Discussion of GPCR oligomerization including comments on recent studies using different methods to demonstrate such interactions.]
