REFERENCES AND AUTHOR INDEX  (Online)

The references incorporate an author index. The numbers in **bold** at the end of each entry indicate where the publication is referred to in this book.

Electronic references given as ‘Available at . . .’ are found by accessing the url given and then locating the reference from the website. Those given as ‘Retrieved from . . .’ are accessed directly from the url. All such links have been checked prior to publication. However, things change on the Internet—if a link does not work it is worth entering the title of the reference into a search engine such as Google as this often comes up with the reference.

**Notes:** DOI numbers are given where available. A DOI (Digital Object Identifier) number is a unique identifying number which is often assigned by publishers to items, particularly journal articles. Once assigned they do not change, making it easier to find online versions. Many journal articles (especially older ones) do not have a DOI assigned.

Asch, S.E. (1956). Studies of independence and conformity: A minority of one against a unanimous majority. *Psychological Monographs*, 70, No. 9. 113

Brown, S.R. (1980). Political subjectivity: Applications of Q methodology in political science. New Haven, CT: Yale University Press. (This text is out of print. A scanned version is available at http://reserves.library.kent.edu/courseindex.asp—from the ‘Course pages by instructor’ drop-down menu, select ‘BROWN, Steven’ and then click GO; at the next location, click on ‘POL Reference’). 369 370
